Relax

Relaxperience was born out of **C&C Laboratori**'s desire to offer a line of global body care products capable of addressing the needs of every skin type and every treatment need. It is specially designed to help the skin regain its harmony and delicate balance. The treatments are designed to respect the skin and help it in its protective function by enhancing its moisturizing and emollient action. The result is soft, balanced and healthy skin.

To achieve these results, we have equipped ourselves with a state-of-the-art structure, investing significant resources in the **RESEARCH** and **DEVELOPMENT** laboratory, capable of giving birth to products with unique characteristics, with extreme attention to the choice of ingredients and their synergy, supporting the use of ingredients of **NATURAL ORIGIN (PARABEN FREE - GMO FREE - SLS-SLES FREE - NICKEL FREE)**. The use of the latest machinery and materials for production, the study and realization of attractive packaging, complete the picture of the overall offer

The pursuit of this ambitious goal has led us, over time, to become highly competitive and acquire significant market share, coming into contact with major groups in the cosmetics industry, with whom we plan and develop product lines of unmistakable appeal, including with private-label service

Peeling Gel

Exfoliating with glycolic acid and phosphatidylcholine

A revolutionary exfoliating treatment based on a unique blend of alpha hydroxy acids and natural extracts of **apple** and **lemon** that, visibly renews and exfoliates the skin, removing dead cells, toxins and impurities. The valuable combination of enzymatic Bioliquefacts of **pink grapes** and **wheat bran**, stabilized with the exfoliating action of mandelic acid, makes the product ideal for completing a deep and effective smoothing action in a short time. Its lipid-reducing action is guaranteed by **phosphatidylcholine**, which, thanks to its chemical-physical characteristics, penetrates easily to offer valuable help in combating blemishes caused by the most difficult-to-eliminate fat accumulations, often found in the belly, hip and thigh areas. Day after day, it renews the skin, helping it regain its ideal perfection by making it firmer and smoother.

Men's Shower Bath

Moisturizing

The act of daily cleansing is transformed into a harmonious moment of well-being for the body. Suitable for all types of epidermis, it is particularly recommended even for the driest and most easily irritated skin. Its exclusive formulation, composed of plant extracts of **green tea** and **ginseng**, exerts an 'intense moisturizing and antioxidant action, respecting the skin's natural hydrolipid film. This highly dermo-philic product is composed of gentle surfactants alternative to SLES and SLS, which classifies it as particularly suitable even for very sensitive epidermis. Its creamy foam, enriched with helichrysum extract, does not attack the skin but respects it, giving it an excellent sensation of well-being and pleasure.

Gommage scrub for breast

For firmed, smoother and visibly more beautiful skin, add the Gommage scrub for breast to your routine, which offers a unique overall solution and a novel sensory experience. Its texture provides immediate intense hydration, even after rinsing the skin. Thanks to the softening action of honey your skin will be wonderfully soft and smooth, the microspheres will take care of skin exfoliation and cell renewal and the collagen will make your skin beautifully moisturised. Its formulation, enriched with lipids of vegetable origin, restores the hydrolipidic film, favouring an extraordinary restorative action.

RCTSPS

SDS

Silk protein

Silk Drops, anti-aging fluid for mature skin. A true beauty treatment. It is a redensifying serum, rich in silk proteins, that fights premature aging by stimulating the original functions of cells, corrects the levels of hydration, dryness and nourishment of the skin. By using it habitually, the face acquires the characteristics of silk: softness, elasticity and shine. Thanks to its low molecular weight, silk proteins are able to penetrate into the deep dermal layers, where their distinct hygroscopic properties are best able to prevent dehydration, keeping the skin relaxed and hydrated for longer. Its distinct velvety and moisturizing character makes this product suitable for both face and body, giving the skin special softness and delicacy, making it finer, smoother, brighter and more even.

cod.
RCTSSR

SDS

Breast firming serum

A combination of high cosmetic technology and precious ingredients of natural origin. Day after day, the breasts appear fuller and more voluminous. **Ximeninic acid**, a true natural skin support, helps to redensify and recompact breast skin tissue, combat loss of epidermal tone and elasticity, and prevent sagging and stretch marks. A shock treatment based on extracts of **Ginkgo biloba** and **African kigelia** exclusively of plant origin that increase the firmness and elasticity of the epidermis, strengthening the supporting capacities of the skin structures of the breasts while fighting sagging.

cod.
RCTSM

SDS

Breast firming mask

Precious, concentrated, firming and plumping mask specifically for the delicate skin of the breast. A targeted formulation to restore firmness and tone of the breast. The careful blend of ginkgo biloba extracts and silk proteins aim to firm the tissues in depth, while coconut and soya vegetable oils act on the surface to give elasticity to the décolleté. The emulsion enriched with beeswax restores tone and firmness to tired skin and prevents the formation of stretch marks, leaving the skin more relaxed, firm and redensified.

cod.
RCTSC

SDS

Breast cream

its an excellent product that will fights off the appearance of ageing and restores your décolleté giving firmness and a youthful freshness. With highly moisturising and stimulating properties it is a real shock-therapy treatment, capable of improving elasticity, skin softness and the aesthetic appearance of the breast. Its secret is contained in a bio-fermented Pichia yeast that acts by stimulating the natural synthesis of collagen and elastin, essentials to having a toned and smooth skin.

Cold gel for legs

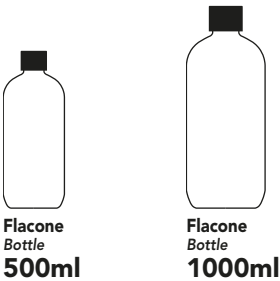

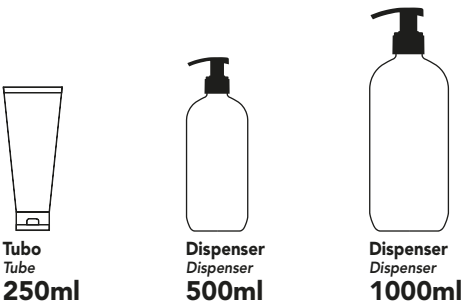

Gel with velvety texture, for the treatment of heavy legs with tendency to capillary fragility. Thanks to its draining, refreshing and pot-protecting ingredients like: Rusco, Burdock, Horse Chestnut, Menthol and Camphor gives a pleasant relief, activates the microcirculation and improves the elasticity of the tired, thickened and particularly fragile skin. It protects the walls of the vessels and, by exerting a decongestant and vaso-tonic action, it gives a sensation of beneficial lightness and immediate freshness.

Ready-to-use cryofluid
for cold bandages

Formulation designed to drain and tone specific areas such as: legs, arms and hips. The refreshing effect of menthol and camphor is enhanced by pinatural extracts of **Centella**, **African kigelia** and **horse chestnut** which exert an important draining and toning action on the skin, reducing the stagnation of liquids. Adjuvant in the treatment of cellulite.

Cryofluid concentrate
for cold bandages

Lipodren Maté

lipo-reducing and draining

“Maté and other infusions’ ritual is sacred. For other cultures this ritual is ceremonial and it needs the right timing”.

Following the same philosophy, RELAX is glad to present the anti-cellulite shock treatment Maté e Chocolat, a grouping of cosmetic products for wellbeing & Spa treatments.

Treatment protocol

- 1) Apply Butter Massage on the areas of the body to be treated by realising a brief massage
- 2) Put the **Activator Salt** on the areas treated with the Butter creating a strong exfoliant action
- 3) Nebulise the **Active Concentrate** on both products creating a real emulsion. In this way the Activator Salt will be solubilised and it will give an osmotic effect to your skin
- 4) Remove everything with a sponge soaked in lukewarm water; nebulise the **Draining Serum** or **Lipo-reducing Serum** according to the needs of the chosen treatment
- 5) Spread everything with **Massage Cream** until the product is completely absorbed

cod.
RCLMB

Massage butter lipo-reducing

The treatment is studied in order to slim down and reshape the silhouette, especially in the area oh hips, legs and glutes, by creating a strong draining action. It stimulates the skin's activity with an effective moisturizing and slimming action. Lipo-reducing treatment with an innovative complex of natural active ingredients: **mate-cocoa-caffeine**, enriched with essential peppermint oil.

This system radically transforms the existing techniques; it represents an overall epilation regarding many parts of your body such as groin, legs, arms, armpits and the top of your lips. These waxes are applied in wider areas and they can be removed through an easy rip reducing the treatment time. In this way, this system will result effective, quick and pleasant. It does not need any textile stripe. The employment of a multidirectional technique does not require the respect of hair's direction. These waxes are based on vegetal and low-melting resins and they do not damage the capillaries. They also possess more plasticity in order to adhere to your hair. In this way, the waxes result painless and the hair removal takes place in depth also on smaller hair

These hot waxes line, conceived with a series of new formulas, allowed us to realise some products with both high quality and ease of use. This process is an added value during the epilation. The process of epilation with this kind of waxes conform to be wider and it does not need any rips for wax removal. The texture is soft and it dries quickly because of the new formula Virgin Beeswax, which allows a better hair adherence and a less painful epilation. Furthermore, it guarantees a lasting and professional epilation leaving your skin soft, smooth and clean. This wax is available also in pearls model and it allows a more rational use of the product. In fact, it is possible to regulate the quantity according to the needs and to the dimensions of the area to be treated.

These formulations are realised with mixture of resins esterified with glycerine and highly refined oils which, through specific processes, give rise to depilatory waxes of different types. They include the three main qualities that a depilatory wax has to possess:

- Fluidity which offers an excellent applicability
- A very sensitive rip on the skin and, at the same time, effective on the hair
- Ability to avoid the risk of annoying reddening

These waxes are appropriate for both young and mature skins, which need a frequent epilation. They have to be applied to body temperature and they are highly recommended for pain-sensitive people. Their composition is totally natural, it ensures the maximum hygiene and it can be preserved for long periods. They consent both small and hard hair removal for a professional epilation, leaving your skin smooth, soft and without irritations

This paste can be applied on every kind of skin. In fact, it is appropriate for male and female skins, for more sensitive and risk of allergies one and in case of dermatological problems, for example psoriasis; the treatment is almost painless because the paste adheres only to the hair and not to your skin, avoiding redness, folliculitis and irritations. It is employed at low temperature thanks to its soft rip and is highly recommended for every varicose vein and fragile capillary. This paste is able to eliminate even the smaller hair, 2 or 3 millimetres. The frequent use of Sugar Paste considerably reduces the regrowth while the hair will result smaller. The manual technique requires training. It is very important to follow the instructions and to repeat this operation in order to acquire the needed manual skills.

Chemical peeling with glycolic and mandelic acids

Extracted from sugar cane, **Glycolic Acid** is the most widely used substance for peeling treatments, which remove dead cells that hinder respiration and slow down physiological skin cell turn-over. Designed for more mature skin, in combination with a milder nonphotosensitizing alpha-hydroxy acid obtained from bitter almond extract: **mandelic acid**. Extremely active for all treatments aimed at thinning the stratum corneum, improving dryness, elasticity, imperfections, blemishes and impurities on the face. Sebum regulator, refines skin texture, enlarged pores, stimulating the production of neocollagen and elastin giving perfection to the face.

Chemical peeling with 35% mandelic acid

A product designed for more mature skin, it exerts an intense smoothing action thanks to a nonphotosensitizing alpha-hydroxy acid obtained from bitter almond extract: **mandelic acid**. On the surface it smoothes and revitalizes the face, bringing an extraordinary purifying action to the skin by stimulating cell turnover.

Peeling gel exfoliating

Mixture of extract of **Apple and Lemon**, renews and exfoliates the skin, removing dead skin cells, toxins and impurities. The combination of bioliquefied enzyme of **Red Grapes and Bran of Wheat**, stabilized with the smoothing action of alpha-hydroxy acids, makes the product ideal to complete a deep and effective anti-aging action in a short time.

Face scrub exfoliating

With micropolymers

A soft cream in which very fine exfoliating particles are dispersed to help remove dead cells and rid pores of impurities. It promotes gentle exfoliation, smoothes the skin, refines the texture and reduces imperfections thanks to its natural active ingredients that brighten the face. **Organic olive, grapeseed and beeswax vegetable oil** give the product superlative emollient activity, combined with highly soothing **aloe, chamomile and mallow extracts**, for gentle, irritation-free exfoliation giving the skin a fresh, soft appearance.

Face/body scrub exfoliating

With microgranules vegetables of hazelnuts and almonds. From our most advanced cosmetic research is born the new exfoliating and revitalizing face/body treatment which, with a deep and natural action respects also the most sensitive and easily reddened skin. Perfect beginning for a treatment of wellness and pleasure, it is a concentrate of substances that nourishes and regenerates the skin. The complex of activities plant like the Sweet Almond Oil, the extract of Aloe, Chamomile and Micro Granules of Hazelnuts and Almonds, exerts an intense soothing and smoothing action allowing to eliminate delicately and deeply dead cells, giving to the skin a soft and velvety effect.

RVUITC

Short beard tonic moisturising

This is the ideal solution in the first weeks of beard and mustache growth as it reduces the discomfort of hair growth. Its special emollient and moisturizing formulation is particularly suitable to give an extraordinary feeling of cleanliness and freshness on the face. Its secret is contained in a mix of natural extracts of **mauve, chamomile, incense, ginger and red grapes** that give to the skin an amazing soothing, antioxidant and protective action. It is applied after each wash to soften and nourish the beard and mustache. Using it from the first weeks, you have a reduction of the typical itch due to the regrowth of facial hair.
